A COMPASSIONATE AND EFFECTIVE DETOX SOLUTION

The Morph Device offers opioid-dependent patients a 100% drug-free way to withdrawal. The device is cleared by the FDA to help significantly reduce the painful symptoms of opioid withdrawal. The Morph Device is a small electrical nerve stimulator placed behind a patient's ear. It stimulates the cranial nerves in the ear to aid in the reduction of withdrawal symptoms.

REMOVING PAIN AS A TREATMENT BARRIER

A recent March 2018 survey of professionals in the addiction treatment field found most patients consider the "pain of withdrawal" as the number one barrier to seeking opioid addiction treatment. Further, between four and five out of every 10 patients quit detox because of the severity of withdrawal symptoms. The Morph Device helps to remove that pain and fear that comes along with withdrawal - helping more patients successfully transition to treatment.

Four to five out of every 10 patients quit detox because of the severity of withdrawal symptoms.

FDA cleared and indicated for use as an aid in reducing opioid withdrawal symptoms.

100% drug-free withdrawal option that offers symptom relief within 20 minutes.
